WARM FUZZIES - I incorporated the following activities in class this week:

10 responses

I incorporated additional activities in my class this week, not listed above:

4 responses

Most of this material is for Live Online or In Person Courses but will do my best to meet the expectations

Before class video/ information and music, assignment record yourself to meet your class videos, encouraged student interaction (in break out rooms) to develop groups, contacted students (asked if they are okay) by email if absent from class, encouraged discussion boards for communication between students on homework, encourages students to form groups (give each other emails for contact) to work outside of class. used student run whole class discussion in solving problems. ask students to expound on others ideas/ opinions

(1) SMART Goals (2) Wellness Class Challenge (3) Brought in two counseling faculty (4) Discussed Internships

Told them not to get discouraged if they feel lost or that they forgot math they were 'supposed' to know how to do from past. I told them that we are applying some WD40 to a wheel that hasn't turned in a while. We are going to use the first couple of weeks to get it moving again.

ENGAGEMENT - I incorporated the following activities in class this week:

11 responses

I incorporated additional activities in my class this week, not listed above:

4 responses

Connected with students who were falling behind logging in and completing work; weekly motivational message combined with look ahead at next week

Gave a presentation in class about Mayan Numbers and showed them pictures from my trip to Guatemala where I saw some of the villages there teaching Mayan numbers to children.

SMART Goals and Class Healthy Habits Goals

Name tag communication. Students write a note to me, either in general or regarding a topic I set, and respond back in writing.

Greeting students at the door, by name/to learn names.

Held live feeds for students not able to attend in person class.

3 responses

Greeted students at the door.

Weekly Motivational Updates

For my calculus class, they had a study session with 2 tutors from ASC before 2nd exam. We also had a review session for exam 2 in class so students could ask questions before exam. I also had additional meeting hours with my math class for teachers. They have a semester long project and I meet with the individual 14 groups for half an hour about their project. In my live online class, we have been using the polling feature at end of class to see where everyone is at in class.
